#	RESPONSES	DATE
1	At-Large are keen to engage in a webinar or similar joint activity on the Marketplace proposal	8/28/2020 11:18 AM
2	Suggestion: On the recommendation trepidation session, it may be better served to have some actual proposals for moving forward being published ahead of time and the discussion be based on debating the merits of each. Suggestion: The human rights discussion may best be served as a webinar this meeting to get the broader community up-to-speed on the issues with a goal of having an informed discussion based on some concrete proposals at a future meeting.	8/27/2020 12:10 PM
3	We did not support many of the proposals for the following reasons, all of which were based on the current proposal formulations and/or not well suited for ICANN 69: * Multistakeholder: as this issue is still live, we are concerned that any session would get ahead of the Board and their decision making. Support consideration for ICANN 70 * DNS Abuse: this issue clearly important, but was covered AT LENGTH at ICANN 68 and 66. Also concerned with current proposal formulation. Would support revisiting for ICANN 70. * Consumer Protection: concerned with current proposal formulation. * Recommendation Trepidation: (NOT YET READY FOR PLENARY; WAIT FOR ATRT3) Rationale: Not at ICANN 69 due to repetition of the topic from recent past ICANN meetings OR due to the topic not having become fully mature i.e. underlying issues are work in progress e.g. subject to board input.	8/27/2020 12:08 PM
